Initial Build Notes:

What's Working Well:
- Looks really good so far!
- Love the gallery slider on the home page
- Like the new font
- Color scheme working well

Things To Work On:
- Responsive design
  - Right now the title sections are images
    - Can try making the image and text a 2 column grid and floating the text below the image
    - If struggling with responsiveness using the image, can also switch it out to to be an h1 tag with the same font as the navigation menu (might be less blurry)
- Emotions Section
  - For Riley, Mom, and Dad, try making the subtext the same width as the image (similar to how the emotions are laid out)
- Production Section
  - Adding images underneath the "production" and "writing & animation" so it's not just all text
- Navigation Bar
  - Adding a hover effect (maybe the color changes when you hover over something in the nav bar)
